Task

✓ Status

Incomplete

Introduction

In this activity, you will create a document describing your findings as you research the risks and vulnerabilities you have uncovered for Big Dog in the case study Cat Scan II.

Instructions

Using the results of your discussion and research you have completed on the Big Dog vulnerabilities and risks, create a document that organizes the information, prioritizes the vulnerabilities and risks, explains your decisions, and documents your sources so they are easy to interpret and understand.

Be prepared to discuss your findings in class during the lecture.

Conclusion

By the end of this exercise, you should have created a document that includes:

- The list of assets owned by the Big Dog organization and their vulnerabilities
- The research of the vulnerabilities and risks to learn more about them
- The prioritization of the risks from most important to least important
- Your research sources and results
