Cyber Security Regulations Presentation

Task

40m

Status Incomplete

Introduction

In the reading Introduction to Regulatory Drivers & Cyber Security Compliance, you learnt about regulatory drivers & cyber security compliance. In this activity, you will first read about the Cyber Security regulations specific to Canada and then create a presentation summarizing the regulations that are applicable for organizations operating in Canada.

Instructions

Part 1: Read through the following article by McMillan Legal Group in Canada that will provide you with a brief overview of the legal landscape in Canada with regard to data privacy and Cyber Security regulations.

[McMillan, Cybersecurity – The Legal Landscape in Canada](#)

> 👉 As you read the article, take notes to help you create the presentation in the next part.
>
> ## Question
>
> Reflection Questions: After you have read the article, reflect on the following questions. You may record your responses in your PKM.

- This article was written in 2017, do you think things have changed much? Where might you be able to find more up-to-date information?
- Who within an organization might the sorts of folks/roles that would be involved in contributing to collecting and maintaining this sort of knowledge for the organization?
- Where can you find out more about what they do?

Part 2: After you have read the article, create a short presentation that could be delivered to the Executives and C Level members of your organization summarizing the types of regulations that affect organizations operating in Canada, and their security postures.

> ℹ️ You can always engage into more research beyond the McMillan article you read in Part 1 in order to add more insights and relevant information to your presentation.
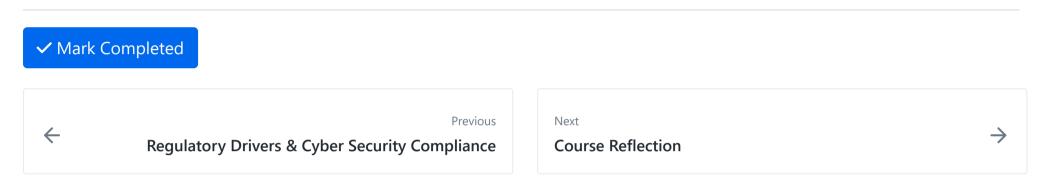

👉 Create your presentation on Google Slides. Also, keep your presentation upto five slides only.

Once the presentation is ready, post the Google Slides link on Discord for any peer feedback. Compare your results & findings with that of your peers' and makes adjustments to your presentation, if required.

Conclusion

By the end of this exercise, you should have understood and analyzed the following:

- How a company's business process is shaped by the regulatory drivers/compliance that affects their business
- How a Cyber Security framework provides guidance and how the security hardening will be implemented in direct response to the regulatory requirements
