Sharing Research Findings

Task

45m

Introduction

Researching is exciting, and even more exciting is sharing the findings of the research with your peers. You are going to do exactly that in this activity – sharing your findings of the Cyber Security attack research.
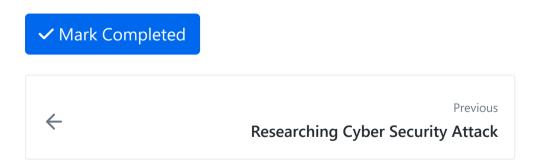

Instructions

Follow the instructions given below to share and discuss your findings:

- Share the Google Doc, where you have documented your findings, on Discord.
- Observe and discuss different aspects of the attack your peers have documented.
- Support a peer, or take motivation from their work, as you analyze and discuss the findings of their chosen attack.

Conclusion

Now that you have documented the findings of your research and shared & discussed them with your peers, it's time to go to the lecture and understand the requirements of the report-writing project in even more detail.
