Threat Actors and Their Tactics
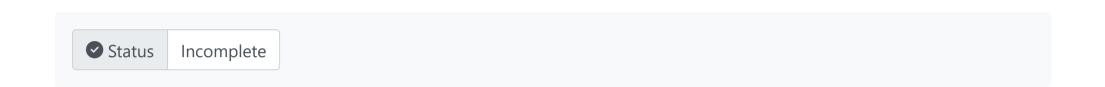

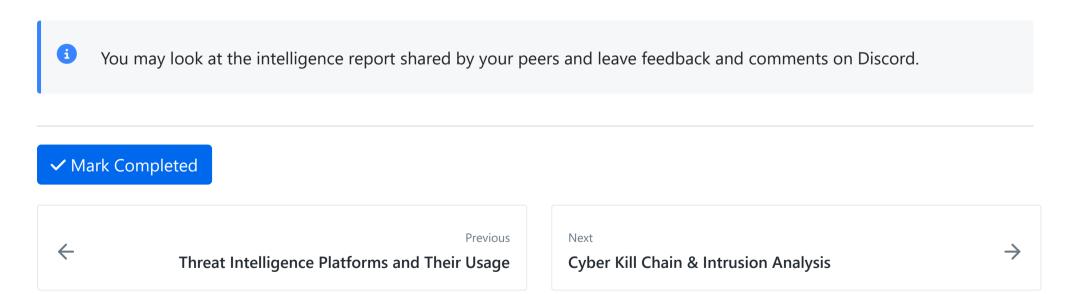

Task

1h

✓ Status   Incomplete

Introduction

Individuals or groups that attack persons or organizations online for the purpose of gaining personal, national, social, or political advantage are known as cyber threat actors. In this exercise, you will create an intelligence report that profiles 10 different actors.

Instructions

Read the instructions below to create the intelligence report on threat actors:

- Create an intelligence report that lists 10 threat actors and their known tools and tactics that they employ to carry out unethical cyber activities.
- Identify threats actors that have been active in the past 10 years.
- Ensure the target sector of their activities is also mentioned in the report.
- Once done, post your report on Discord.

ⓘ   You may look at the intelligence report shared by your peers and leave feedback and comments on Discord.

✓ Mark Completed
